October 2021 - New Accreditations for BDS

The BDS Group has been working with Compliant FM to adopt a new Management System.

This has resulted in BDS being audited to ISO 14001 for Environmental Management and ISO 45001 for Health and Safety Management.

The application was in April 2021, the audit was a 2 stage process with Stage 1 taking place in July and Stage 2 in September and on 5th October we were presented with our Certificates.

So now with the Environmental ISO14001, BDS has shown its commitment to the world by conscientious management of our business with "green initiatives" and our minds always giving consideration to sustainability with the planet in climate crisis.

BDS also enhance our Health and Safety Management with ISO 45001 complementing our previous reliance on SSIP listings for accreditation in this field. With BDS already having ISO9001-2015 we now hold the main trio of ISO's which interlock within our company business management structure enabling us to continue to grow with confidence into the rest of the decade ahead.

Graham Hawkins.

Compliance Manager.

BDS - Fire and Life Safety, Integrated Security

With the implementation of the Regulatory Reform Fire Safety Order from 1st October 2006 it is the responsibility of the system user or appointed responsible persons to ensure the installed fire detection and alarm systems are maintained correctly To this end the Chief Fire Officers Association (CFOA) and the Fire Industry Association (FIA) advise that companies with third party accreditation, such as British Approvals for Fire Equipment & Systems (BAFE SP203), should be contracted

Why Choose us?...

We Care...
If you don't care about the service you provide you don't care about your customers! Our enthusiasm for what we do makes us care...

Our Experience puts us in your corner...

Our Five Senior managers have over 25 Years each experience in designing, installing, commissioning and maintaining fire and life safety systems our engineers are time served and are constantly being enhanced in the latest technology attending regular training sessions

We understand Urgency and have an open book policy Never letting our customers down and being there quickly when there is a problem is a key part of our commitment to you - We also commit to support your fire and safety equipment on a 24/7 basis. Customers subscribing to this service are guaranteed a response 24 hours a day, 7 days a week

We are truly independent and offer bespoke services to exactly match your needs and budget

We have formed partnerships with the world's leading fire and safety product manufacturers. We are not tied to any manufacturer allowing us to deliver the most appropriate and cost effective products as part of our solutions.

We are able to install and maintain equipment for the following suppliers: Notifier, Gent, Morley IAS, Kentec, Advanced, Haes, Protec, C-Tec, Global, Fike/Rafiki, EMS, Apollo, Hochiki, KAC, Thomas Glover, Airsense, Vesda, Fireray, plus many more...

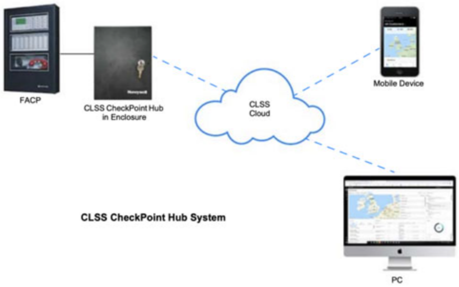
BALENCIAGA

September 2021 - Balenciaga

From the streets of San Sebastian, Spain to Sloane St, London, BDS have recently completed the supply, install and commission of the fire alarm, intruder alarm, CCTV and video entry system at this well-known fashion brand. The Kentec fire alarm and bespoke security systems ensure these high valued products are offered the most robust level of protection.

August 2021 - Milton Gate

A long-standing client of BDS approached us about the upgrade of their existing Gent fire alarm system. Gent, having provided its close partners with its health check download tool, we were able to provide a comprehensive overview of the systems age, status, and upgrade requirements. This resulted in numerous devices and panels being upgraded, providing the client with a reliable and up to date system.



August 2021 - Honeywell system trial

BDS are trialing the new Honeywell application CLSS at multiple sites in the UK. The main site covered is the AELTC at Wimbledon. We have used the system for creating full reports for building testing and full fire and fault signalling to engineer's handheld mobile devices. It is very helpful and reduces engineer time during testing. The engineers can check each device has the correct label fitted whilst testing rather than checking a printout after the testing is complete. The full testing reports are emailed to the office as soon as the engineer ends the test on their handheld mobile device.

THE CHAMPIONSHIPS
WIMBLEDON
2021

SOURCE: WIMBLEDON WEBSITE

July 2021 - AELTC Wimbledon

We are happy to report that the lawn tennis Championships have returned to AELTC Wimbledon after being cancelled for 2020. It was a challenge to provide full fire cover for the temporary tournament marquees, but BDS managed it with credit from the club for our professionalism.

We had issues from external sounder beacons during the Championships that had evacuated visitors and guests from Centre Court when only staff alarms should be in operation. This was an issue created during a refit of Centre Court in 2009, but only highlighted now. We had engineers work through the night to clear the problem and the tournament was not affected.

June 2021 - Banstead Cricket Club

Helping the local community has always been an important part of our operation. With that said, BDS undertook the installation of a new alarm system at Banstead Cricket Club completely free of charge...

This included everything through design and commissioning to installation. We do a lot of work at Lords Cricket Ground and felt that this was a great way to give something back to our community and to cricket.

The system provides the premises with the ideal level of protection and intruders off the wicket. Howzat that for community spirit!

May 2021 - Duncan House

With the COVID-19 pandemic having affected all sectors, BDS were excited to undertake this project that entailed our engineers commissioning a multi-networked Gent system for student accommodation. With tight deadlines and complex cause and effects the pressure was on, but we are happy to have got this over line, with students returning to their dorms and continuing their education within a normal environment.

March 2021 - 135 Bisphopsgate

We're nearing completion of 135 Bisphopsgate, London. Works included a Gent system fit out across multiple levels of the building. Advanced gas suppression panels throughout 13 SER, MER and UPS rooms each with FAAST aspiration units. We're hoping to have these works completed very soon.

HM Revenue & Customs

February 2021 - HMRC

We have recently completed works at the brand new HMRC building located in Stratford after commencing the project last March. With a complete upgrade of the Fire alarm and PA/VA system using the Advance Electronics MXPro5 networked fire alarm system & TOA PA/VA. We were happy to complete the handover process while receiving some great feedback...

January 2021 - Heckfield Place Hotel

We are delighted to have been awarded the maintenance contract for the Fire Alarm System, Fire Suppression System & Disabled Refuge system at Heckfield Place Hotel, Hampshire. The Georgian grade II listed manor house was originally built in the late 18th century, but recently after a huge & sympathetic refurbishment programme has opened as a luxury country house hotel.
