

Introducing Home Security

When your home is secure, you feel secure...

It's human nature to protect the people and possessions we hold dear and everyone enjoys feeling safe and secure. At BDS we really do understand this better than most. Burglaries are an unfortunate fact of life and being broken into is a traumatic experience. But while the loss of your possessions (especially those with sentimental value) is deeply upsetting, it's the emotional trauma of a break-in that can be even harder to get over...

From a monitored house alarm which helps keep out unwanted intruders, to more complex home security systems that monitor live events via CCTV to your smart phone we can even detect floods and monitor the temperature in your home giving you peace of mind. All backed up by **NSI NACOSS GOLD SCHEME** with respect to the following scope: the Design, Installation and Maintenance of Electronic Security Systems including: Access Control, CCTV Systems & Intruder Alarms.

Wired and Wireless Intruder Alarms - Access Control Zoned
Security Lighting - CCTV - Public Address Systems - Video & Audio Entry
Hearing Induction Loops - Nurse Call Systems - Auto Doors
Automated Gates
